Bemidji, MN · Remote; willing to travel to Columbia, MD as needed · Available for day, evening, overnight, and weekend shifts · No visa sponsorship needed

Summary

Reliable, documentation-focused technical support candidate who stays calm under pressure. Built and documented a Linux home lab running a ticketing system and a live video stream, troubleshooting faults from logs. Brings FAA training in real-time, procedure-driven operations, seven years of daily record-keeping in electronic records systems, and daily customer contact at USPS.

Technical Skills

- **Support:** troubleshooting; documenting actions, findings, and results; escalation; front-line customer communication; Zendesk Agent Badge
- **Systems:** Linux (Ubuntu Server): SSH, systemctl, journalctl, apt, log collection; PC hardware and OS troubleshooting; CompTIA A+
- **Networking:** IP networking, DNS, DHCP, switching and VLANs (Cisco IOS CLI in Packet Tracer); Cisco CCNA study, in progress
- **Video:** OBS live streaming, bitrate and latency troubleshooting
- **Development:** JavaScript, Node.js, HTML/CSS, Git
- **Languages:** English, Spanish (advanced spoken, written, and read)

Projects

Home Lab: Linux Server, Help Desk Ticketing, and Live Video · Oct – Nov 2026

- Built an Ubuntu Server VM administered over SSH; managed services with systemctl and diagnosed faults from system logs with journalctl.
- Deployed osTicket and logged real lab incidents as tickets with symptom, troubleshooting steps, cause, and fix.
- Streamed live video from OBS to a self-hosted media server; broke the stream on purpose, diagnosed the failure from logs, and documented the fix.
- Built a VLAN network in Cisco Packet Tracer (simulated): access ports, trunking, and inter-VLAN routing from the IOS CLI.

Technologies: Ubuntu Server, VirtualBox, SSH, osTicket, OBS, Cisco Packet Tracer, GitHub

Experience

Part-Time Flexible City Carrier · United States Postal Service · Bemidji, MN · Jul 2024 – Present

- Qualified on all 9 city routes in the Bemidji office (357 to 911 addresses each, 6,100+ total); assigned a different route daily, six days and about 60 hours a week, on foot and by vehicle. • Record deliveries and customs, postage-due, and C.O.D. transactions on handheld scanners; answer customer questions and escalate delivery problems to supervisors.

Air Traffic Control Specialist (Trainee) · Federal Aviation Administration · Oklahoma City, OK · Jan 2024 – May 2024

- Trained for real-time, high-stakes operations following strict procedures, issuing clearances and maintaining aircraft separation in live simulation.

Positive Support Specialist · Lutheran Social Service of Minnesota · Bemidji, MN · May 2019 – Sep 2024

- Documented incidents, daily logs, and medication records in Therap (an electronic records system) and handed off open items across shifts.
- Reviewed open cases from previous shifts and saw them through to resolution. • Supported adults with developmental disabilities in daily living skills, staying calm and de-escalating under pressure.

Web Development Training and Projects · Self-directed (100Devs, The Odin Project, Frontend Mentor) · Jan 2020 – Dec 2023

- Built and deployed more than 15 projects alongside full-time work (github.com/Selt0), including campMN, a full stack app with user accounts, photo uploads, and maps (Node.js, Express, MongoDB), deployed to Heroku.
- Troubleshot deployed apps: read error logs, found the cause of bugs, and wrote up each fix in the project's README.

Earlier roles: Direct Support Professional, REM North Star, Bemidji, MN (2017 – 2019), including daily electronic record-keeping · Guest Service, Rosewood Washington, D.C. (2017)

Education

Montgomery College · Rockville, MD · Computer Science and Cybersecurity coursework, 51 semester hours, GPA 3.86 · Phi Theta Kappa, Dean's List · Relevant coursework: Introduction to Networking, Network Security, Microcomputer Essentials, Introduction to Scripting

Bemidji State University · Bemidji, MN · Computer Science coursework (no degree)
